GreenCaMMp Workshop

17.12.2021 - online session

AGENDA of the Final Event – Interregional Campaign Bringing Green in My Region, 17.12.2021, hours 16.00-18.15 (EES)

16.00 – 16.45: Webinar ”Closer while distancing”

- ❖ Short introduction/salutations from EUROPE DIRECT partner centres: Radu BIG - coordinator EUROPE DIRECT Maramures, Alina MISIŪNIENĖ – coordinator EUROPE DIRECT Panevėžys, LASZLO Cecilia – coordinator EUROPE DIRECT Szolnok
- ❖ Introducing the ”Closer while distancing” good practices catalogue –
Noemi GANEA, Margareta CĂPÎLNEAN, Maramures County Council;
 - ❖ Presentations/short interventions from the contributing teachers to the good practices catalogue regarding remote teaching methods;
 - ❖ Online voting and awarding the winning good practices.

16.45 – 17.45: ”Green CaMMp” Workshop – facilitator, Liviu Ioan NEAMȚ, associate professor Engineering Faculty, Technical University of Cluj Napoca;

- ❖ Presentation "Energy – past, present and future of Earth";
- ❖ Practical works regarding energy, working in groups of students and teachers involved ”Bringing Green in My Region” campaign on dedicated platform

17.45 – 18.15: Awarding ceremonies for the “Virtual Gallery of My Green Region” Photo Contest and ”My Green Agenda” Video Contest, ”Closer while distancing” Exchange of Good Practices – Radu BIG, coordinator EUROPE DIRECT Maramures

Live differently, live sustainably

The project "European citizens- live differently, live sustainably", implemented by the National High School "Mihai Eminescu" Baia Mare, started in 2018, together with teachers and students from Bulgaria, Italy, France and Portugal, and brought in our lives the energy of a new beginning. This ERASMUS project is part of a sustainable development and citizenship process where students are actors and empowered to environmental issues. In Europe, the environmental issue is at the focus of citizen and political concerns. Participating countries are experiencing the effects of climate change and are keen to educate students about environmental problems by confronting them with real ecological situations. The activities deployed in the 5 partner countries enable young people aged 15 to 18 to develop linguistic, technological and know-how skills to "live together".

Trăiește diferit, trăiește sustenabil.

Proiectul „Cetățenii europeni- trăiesc altfel, trăiesc sustenabil”, implementat de Liceul Național „Mihai Eminescu” Baia Mare, demarat în 2018, alături de profesori și elevi din Bulgaria, Italia, Franța și Portugalia, și adus în noi r trăiește energia unui nou început. Acest proiect ERASMUS face parte dintr-un proces de dezvoltare durabilă și cetățenie, în care studenții sunt actori și împuterniciți în problemele de mediu. În Europa, pr... [Vezi mai mult](#)

Intelligent students from Baia Mare

The educational project "Intelligent students from Baia Mare" took place at "Németh László" Theoretical High School in the 2019-2020 school year, as part of the national project Intelligent Students - funded by the Communitas Association of Cluj Napoca, which organizes an annual national competition, on ecological themes. The main theme was selective collection of waste. Selective waste collection and recycling is the solution available to all in order to save the environment from the pollution and involves the storage of waste in places specially designed for recycling. Paper, glass, plastic packaging, and metal boxes can be subject to a recycling process as well. One of the activities of the contest required to make a video about promoting ecological behavior among young people at Németh László High School. This video was made by the 10th graders, both from A and B classes.

Studenti inteligenți din Baia Mare

Proiectul educațional „Elevi inteligenți din Baia Mare” a avut loc la Liceul Teoretic „Németh László” în anul școlar 2019-2020, în cadrul proiectului național Elevi Inteligenți – finanțat de Asociația Comunitas Cluj Napoca, care organizează un concurs național anual, pe teme ecologice. Tema principală a fost colectarea selectivă a deșeurilor. Colectarea selectivă și reciclarea deșeurilor este soluția disponibilă tuturor pentru a salva med... [Vezi mai mult](#)

One day - among many other - in our green school

The students of class 6 b from Kőrösi Csoma Sándor Elementary School of Szolnok consider that their school an ECO-SCHOOL. They actively participated at a campaign going on in the whole country, where people gather garbage, collecting garbage around the school, with their class. But that is not all, they have green programs all year, like presentations and even their own garden, taken care of by the students.

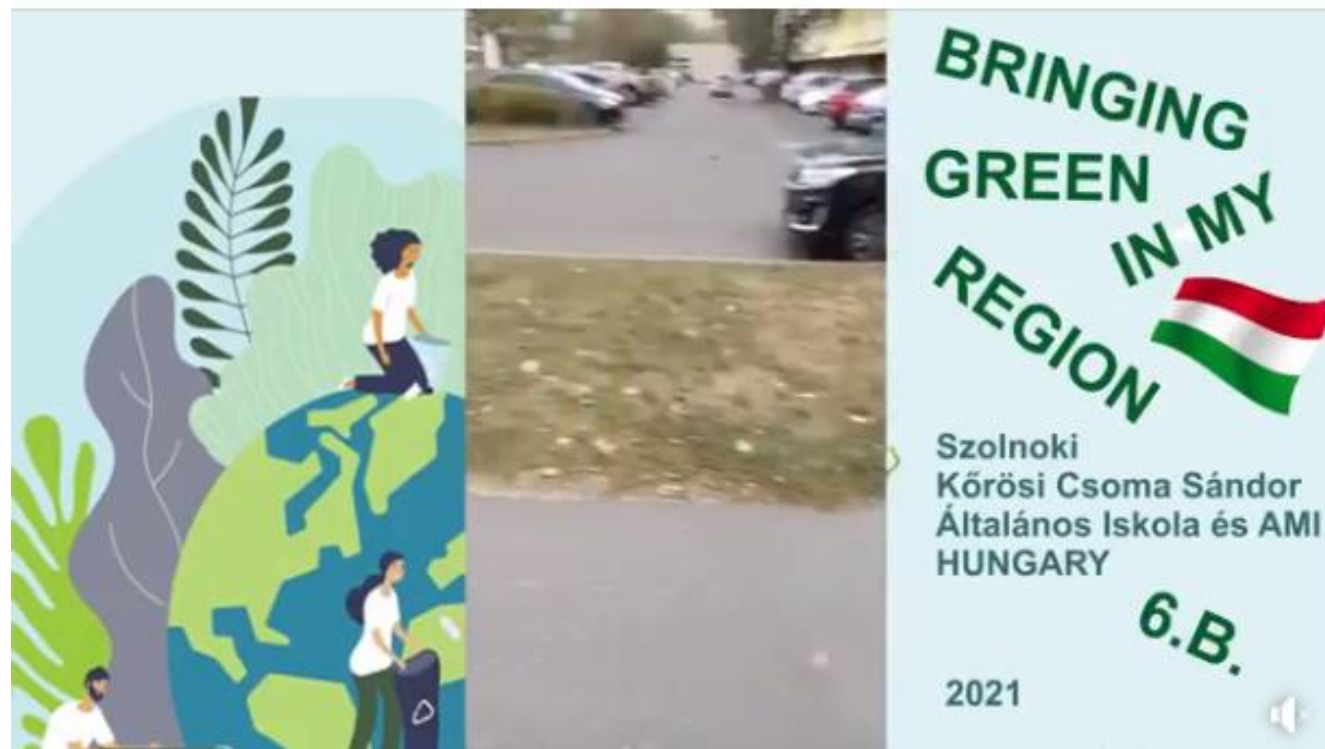

Într-o zi - printre multe altele - în școala noastră verde

Elevii clasei 6 b de la Școala primară K őrösi Csoma Sándor din Szolnok consideră că școala lor este o ECO-ȘCOALĂ. Au participat activ la o campanie care se desfășoară în toată țara, unde oamenii adună gunoaiele, strângând gunoaiele în jurul școlii, cu clasa lor. Dar asta nu e tot, au programe verzi tot anul, precum prezentări și chiar propria grădină, îngrijite de studenți.

Autumn, story tabs

The project "Autumn, story tabs" of the Technical High School "Aurel Vlaicu" Baia Mare aims to improve and maintain the well-being of students by creating a link between them and nature. The connection between nature and students is made either by walking in nature or by watching images, videos or movies, all meant to train students in joy and happiness. The result was a period of complete relaxation and communion with nature.

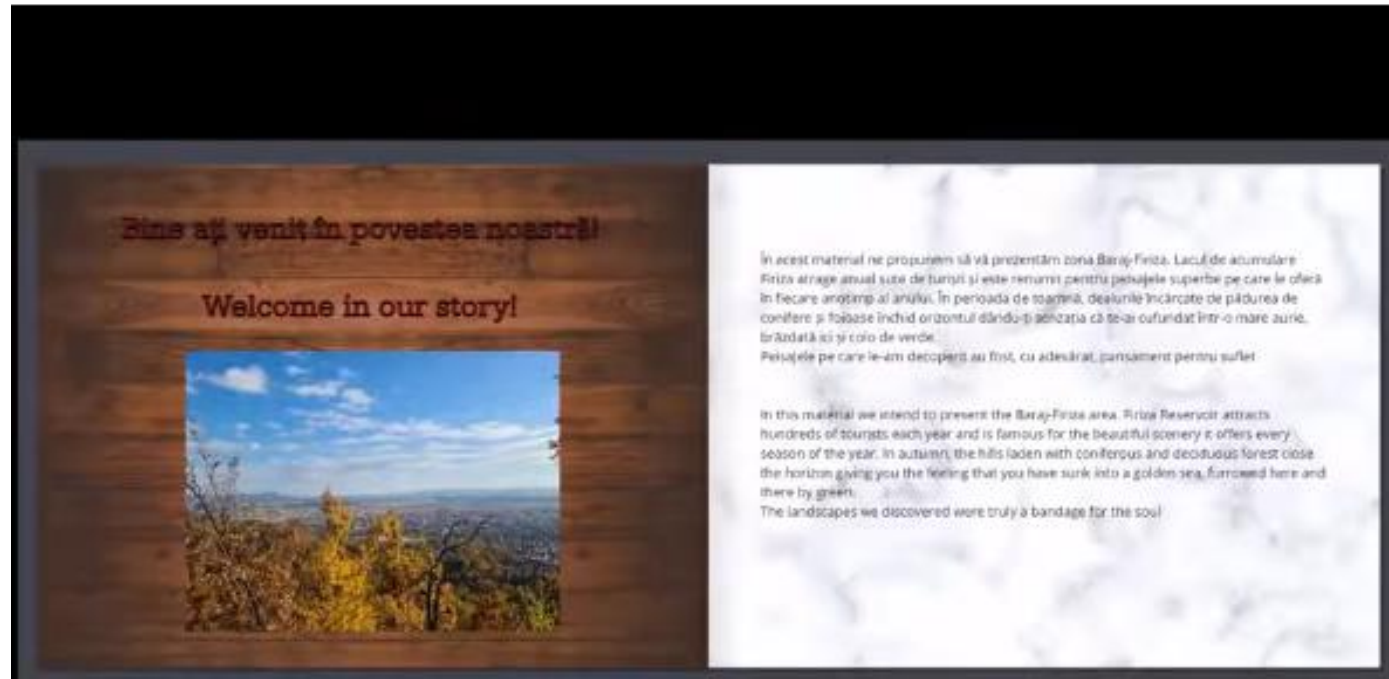

Toamnă, file de poveste.

Proiectul „Toamna, file de poveste” al Liceului Tehnic „Aurel Vlaicu” Baia Mare are ca scop îmbunătățirea și menținerea stării de bine a elevilor prin crearea unei legături între ei și natură. Conexiunea dintre natură și studenți se face fie prin plimbarea în natură, fie prin vizionarea unor imagini, videoclipuri sau filme, toate menite să antreneze elevii în bucurie și fericire. Rezultatul a fost o perioadă de relaxare completă și comuniune cu natura.

WHAT I/MY SCHOOL HAVE DONE TO COMBAT CLIMATE CHANGE

The impacts of climate change will continue to have far-reaching consequences for human and natural systems. Hungary is no exception to this. The video of Kossuth Lajos Secondary Grammar School from Tiszafured is about: What can I do? Is there anything we can do, as individuals or as school communities? Their conclusion is that most of the students are environmental aware as school programmes (World's Largest Lesson project, Forest School Camp, Te szedd! project, Happy Week program, Oco-school programmes, etc.) can create awareness with regard to pollution and climate change. However there is a lot to do to raise the students' awareness and responsibility.

<https://youtu.be/oBLA34tvMLM>

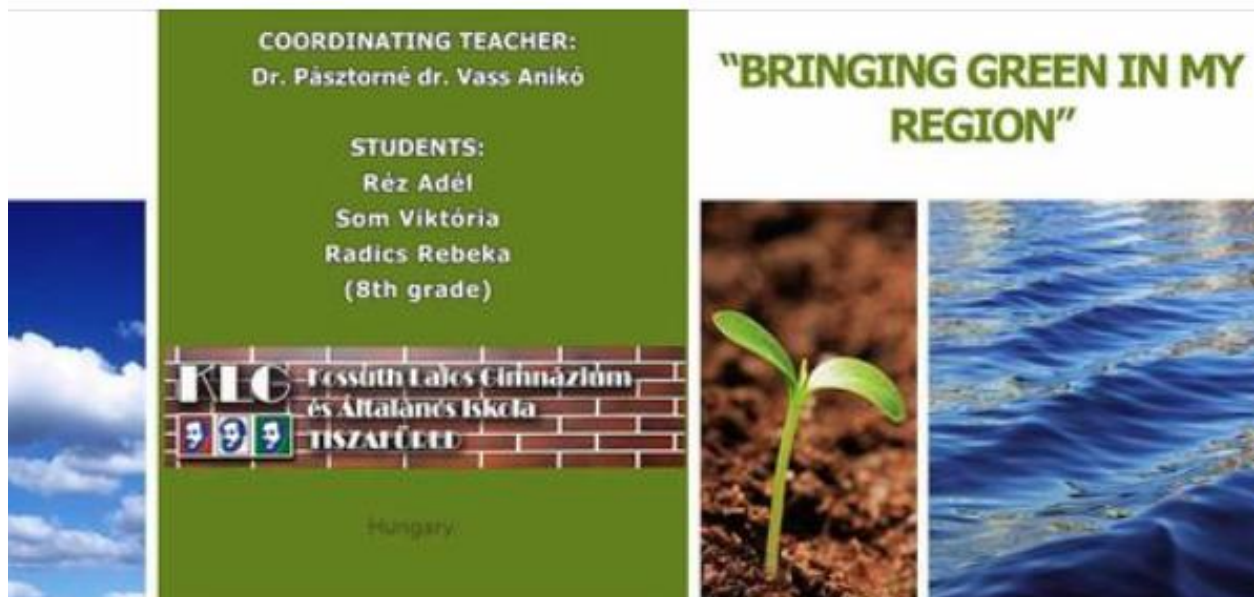

WHAT I/MY SCHOOL HAVE DONE TO COMBAT CLIMATE CHANGE

Impactul schimbărilor climatice va continua să aibă consecințe ample asupra sistemelor umane și naturale. Ungaria nu face excepție de la asta. Videoclipul Școlii Gimnaziale de Gramatică Kossuth Lajos de la Tiszafured este despre: Ce pot face? Putem face ceva, ca indivizi sau ca comunități școlare? Concluzia lor este că majoritatea elevilor sunt conștienți de mediu ca programe școlare (World's Largest Lesson proiect, Forest ... **Vezi mai mult**

Eco-Non Formal

The project „Eco-Non Formal” carried out by Technological High School Baia Sprie was funded within the programme „Green Urban Areas 2019” with support from the Mayor’s Hall Baia Sprie. The aim of the project was to create a multifunctional green area in the schoolyard by involving the beneficiaries in volunteer activities with focus on ecological education and sustainable development (using environmentally friendly materials). The space is getting more and more beautiful every year.

Eco-Non Formal

Proiectul „Eco-nonformal” derulat de Liceul Tehnic Baia Sprie a fost finanțat în cadrul programului „Zone Urbane Verzi 2019” cu sprijinul Primăriei Baia Sprie. Scopul proiectului a fost crearea unei zone verzi multifuncționale în curtea școlii prin implicarea beneficiarilor în activități de voluntariat cu accent pe educație ecologică și dezvoltare durabilă (folosind materiale prietenoase cu mediul). Spațiul devine din ce în ce mai frumos în fiecare an.

Creative Workshop

The project "Creative Workshop" has as main objectives the development of creativity, students' imagination, the creation of eco-friendly behaviors and attitudes among students from the Technical College "Aurel Vlaicu" Baia Mare. Thus, they become future responsible citizens, who love and protect the beauties of the locality and the country in which they live. We also wanted through these activities to improve and maintain their well-being through promoting traditions and creating an atmosphere of joy and happiness, specific to the Spring Holidays and the winter ones.

Spotless Origins

The students from the Arts College from Baia Mare invite you to: "Breathe Nature. Or you're one with her. Everything green needs ... from time to time, people. And everything that is soul ... anything that beats a heart ... tends to green.

You are Nature. And she is the dream. And when there is too little green left in you ... don't forget ... to see green, to hear green ... because everything starts and ends with green!

Raw green, raw green ...

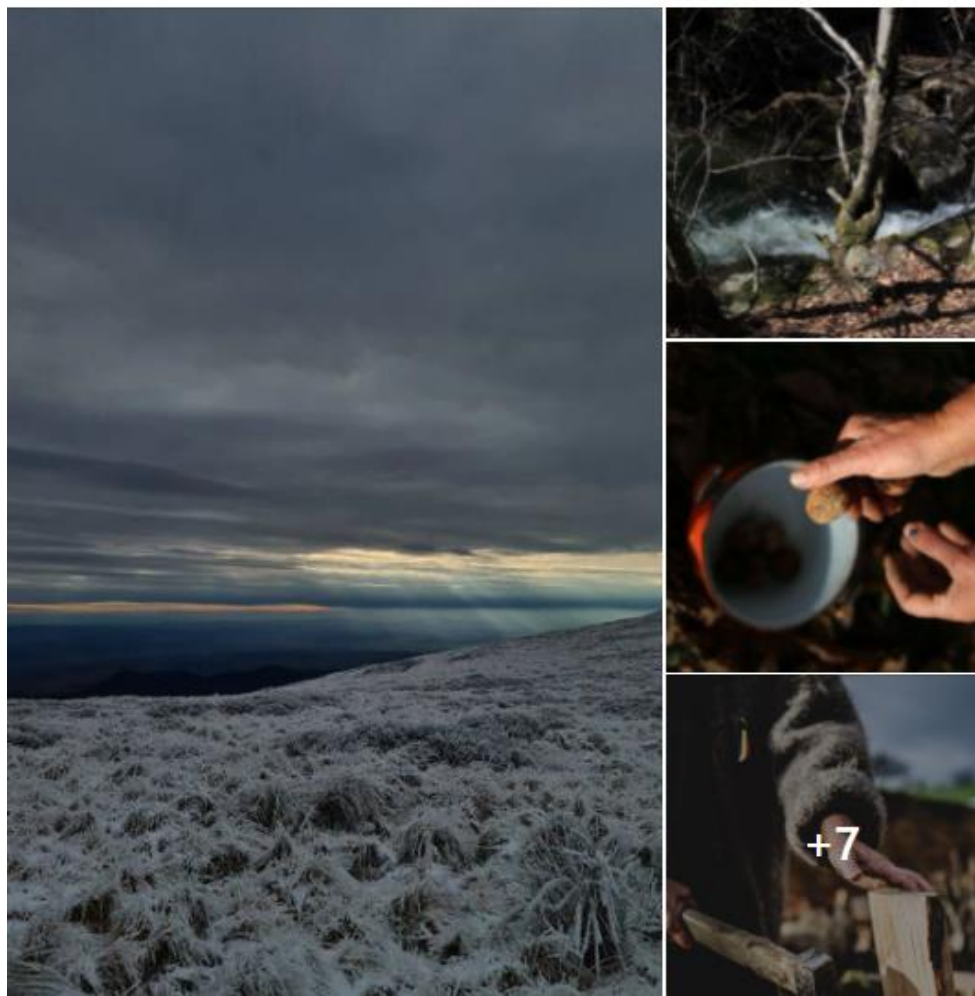

White bud, and pink and pure,

Dream of blue and azure,

I still see you, I still hear you! "

Discover our green city

"Talerlele Medio Monte" is a project implemented in 2020, by Technological High School Baia Sprie, during the pandemic, capitalizing on the transition to online activities - access to applications, development of digital skills, modern promotion, accessible from anywhere in the world. The main goal is to promote green tourism and the town's cultural and natural heritage with a focus on Sustainable Development Goal 11 - Sustainable Cities and Communities. The story is inspired by a local legend and proposes an adventure by taking on the role of a less known legendary figure to discover the real treasures in the community. The project was funded by the "Noi Orizonturi" Foundation: <https://www.greenimpactbaiasprie.com/copy-of-baia-sprie>

Man's hand in mirroring the green Universe

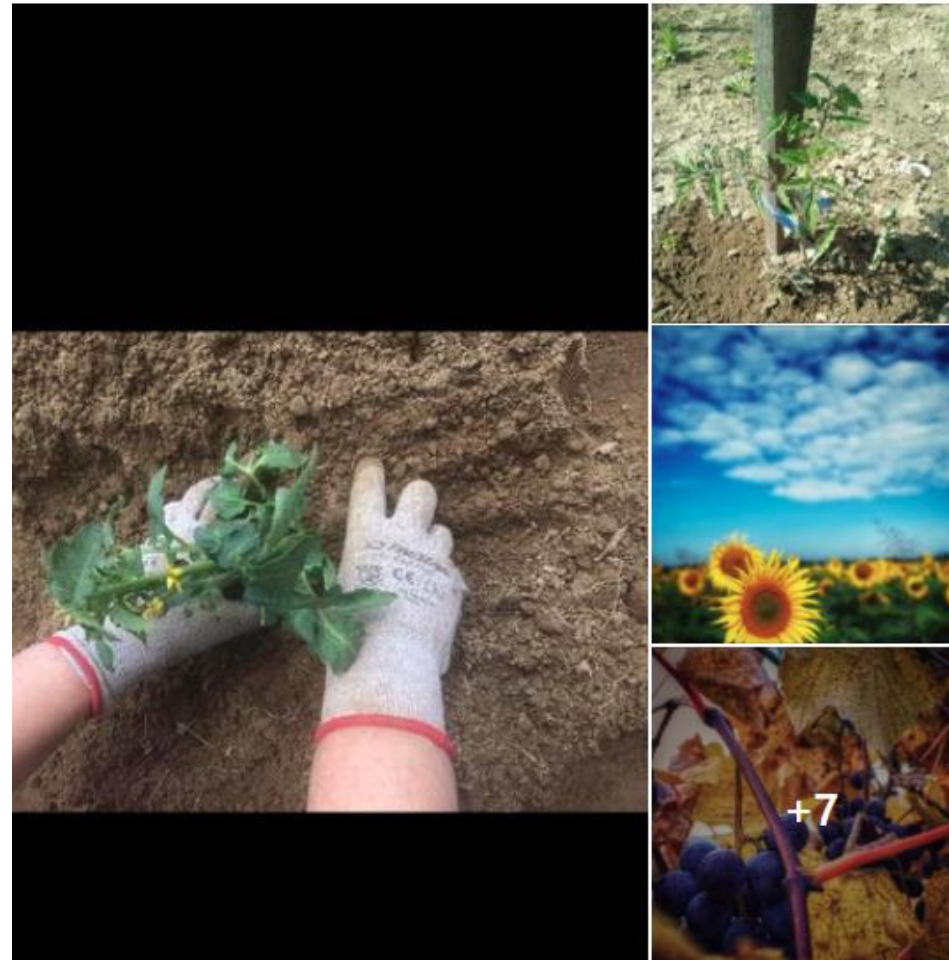

In a country where the issues of protecting and saving the environment are often forgotten by the authorities and society, young people are increasingly involved civically, being aware of the problems of the community they belong to.

The project of the Theoretical High School "George Pop de Băseşti" Ulmeni was born from the desire to encourage the community to carry out more activities to create green spaces, but also from the pleasure of promoting the beauties of nature which, outlined by the skilled hand of the locals, highlight the local reality.

The images capture a part of the work of people who cultivate their lands, contributing, involuntarily, to the realization of boundless stretches of emerald-colored surfaces. At the same time, the photos show the main attractions that our area is proud of, the forests and the Someş river, located on the border between the ethnographic regions Codru and Chioar.

We are creating a green environment

Panevėžys Basic boarding school for the Deaf and Hard of Hearing is a public educational institution providing basic education for the hearing-impaired students of Lithuania Republic. For 53 students with special needs, many of the lessons take place outdoors, for example in Deaf Park (created 12 years ago to celebrate the Climate Change Week), Snail Garden, Vitamin Garden, Outdoor Classroom, Green (Senses) Mountain. The green area of the school shows how much attention of the whole community is paid to the development of aesthetic sense of children. Seeing a beautiful environment from an early age, helping to take care of it, children will also be sustainable when they grow up. Guests will be amazed at how effective outdoor education can be, achieved through games, emotional and physical sensations. For many adults, it is simply a discovery that knowledge can be assimilated in motion.

Save water and save the Tisza River

Kossuth Lajos Secondary Grammar School from Tiszafüred considers that students actually have more practical opportunities to conserve rivers than most people. Their school is located near the Tisza River and the Lake Tisza. One of the educational aims of the school is to make students able to think independently, so that they would face problems well prepared even outside of the school. Students should use their knowledge, skills and creativity to protect the environment and the society. Through campaigns, projects, photos, pictures, school programmes and lessons they can learn the importance of protection of the environment, not to waste water and fight against water pollution.
